Major enhancements in version 7

- Add hyperlink capability to objects and images to open multimedia files, images, programs and web pages.
- Create clip art and background templates instantly from within the software.
- A new Whiteboard start-up mode to get you where you need to go with no fuss.
- New handwriting recognition software, which translates cursive writing and has a built in dictionary.
- Begin typing or writing anywhere and a text box is created automatically.
- Drag and drop GIF images direct from a web browser.
- Save supporting documents with the StarBoard file so they are never lost.
- Print each page of your presentation on a single sheet or multiple sheets.
- Imported Excel documents are split into multiple pages according to their Set Print area.
- Tree view pane added to the clipart/background-browsing window.
- The list goes on - and so does Hitachi - committed to excellence in education. Your partner in presentations.
